Subj: Formal Agreement with City of Troy and New Substation Feed

Date: July 7, 2020

Below are answers to your previous questions.

1. Map attached for new number three feed. The delivery lines that failed shutdown our plant and baghouse system. The proposal has been designed and the new feed will automatically engage if power is lost.
2. We do not have access to a City grid outlining loss of power in November 2019.

Mr. Kenny Campbell
Sanders/KW Companies

Mr. Campbell:

The City of Troy, along with our consulting engineer, Stewart Engineering, has been working on a plan to provide a redundant power supply to the Sanders Lead plant area as well as provide additional electrical capacity. As is the case with our existing power services to you, parts of the system will be owned by Sanders/KW and part will be owned by the City. The City will install and operate the system, as we have always done for Sanders/KW.

Please consider this letter as our agreement for this project. The City has ordered all long-lead time materials, and we expect to begin the project this fall/winter. Based on continued supply chain delays and the nature of our split crew work schedules due to Covid-19, we anticipate 6-12 months to install and implement this system. Please do not hesitate to contact me with any questions.

Sincerely,

Jason A. Reeves

Mayor
